THE DUKES MEMORIAL.

General Information.

Location.

The Ohio Northern University is located at Ada, in Northwestern Ohio, on the Pennsylvania Railroad (Pittsburgh, Ft. Wayne & Chicago Branch). It is midway between the intersection of the Cincinnati, Hamilton and Dayton the Detroit Southern and the Lake Erie and Western Railways at Lima, and the Big Four at Forest. Connection is made with the Hocking Valley at Upper Sandusky, thirty miles east, and the Ohio Central Lines at Dunkirk, ten miles east.

Ada is situated on the great watershed separating the waters of the Mississippi from those flowing into the Great Lakes. Its elevation above the sea-level is as high as that of any other point in the state. The town is well shaded, making it a pleasant retreat during the warm summer months; the climate is healthy, and the City Water Works supply the best of water from drilled wells. The population is about 3,000, exclusive of students. It is comparatively free from the evils of aristocracy and the vices so common in larger cities. *There are no saloons.* Its people are moral, kind and courteous towards the students and take great pains in making their stay at the University both pleasant and profitable. Paved streets, hot and cold water, supplied by water works, electric light, new blocks and residences mark the improvement of the town until College and city are alike new.

Its Object.

The object of the University is to furnish thorough and practical instruction in all its Departments at a minimum cost. Young men and women of limited means may enter the University at any time during the year, pursue their studies so long as they desire or their means allow, and receive full credit for the work done. They may resume their studies at any future time where they left off, and whenever they have completed their respective courses of study they are entitled to graduation honors. Students who find it necessary to pursue their courses in this way do not lose rank or standing in the University as they are compelled to do in the old line colleges. Many of our most worthy young men and women would be denied the privileges of a college education, but for such opportunities as the Ohio Northern University affords. The University welcomes to its halls of learning the worthy of all classes, but especially holds out a helping hand to the struggling and earnest young men and women sincerely desiring the benefits of a liberal education. Consequently, the bulk of our students are mature young people who depend mainly upon their own resources to carry them through college. They come from every walk of life, and know the worth of hard labor and true economy. They *come*; they are not *sent* to college.

Its Nature.

The nature of the Ohio Northern University is unique. It is unlike other schools in many particulars, among which are the following, viz:

1. The school year consists of forty-nine weeks, divided into five terms. Each instructor teaches six classes a day, five days a week.

2. Instead of measuring time by Freshman, Sophomore, Junior and Senior years of three terms each, we give credit for the number of hours **work done in each required study**. When the required number of hours **are completed in any of our several colleges or courses of study**, the student may graduate and receive his or her degree.

3. When a student enters any college or course of study of our University he finds his place just where his certificates or his examination credits rank him. All grades are recorded on our books, and the student having earned them, may take them elsewhere, or if he is compelled to leave school, he may re-enter at any time and begin where he left off, and complete his course of study.

Equipment.

The University has a campus with four large recitation buildings, containing well ventilated and well lighted rooms. The buildings are heated by furnaces or by hot water supplied by the city heating system. They are all lighted at night by electricity. The floors are oiled with floor dressing, which reduces the flying dust, incident to a recitation room, to a minimum. The rooms are also regularly fumigated with germ destroyer, rendering them healthful. Ample blackboards and apparatus are supplied to meet all the demands of illustration, experiments and thorough instruction.

The Chemical and Physical Laboratories are not surpassed, if equaled, by any other in the state. They are large, new and splendidly equipped with tables, operating desks and apparatus complete for teaching those subjects. The museum contains numerous specimens for the masterly teaching of Geology, Zoology and kindred sciences.

Five good libraries supply reading matter in the way of best magazines, periodicals, newspapers, etc. A good reference library is open each day of the week to all students of the University.

In addition to the above the University owns and controls Athletic grounds, which affords parade grounds for the Military Companies, Baseball and Football grounds, Lawn Tennis Courts and the like.

An Auditorium with a seating capacity of 1,500, has just been added to the complement of buildings mentioned above.

The U. S. A. government supplies a military equipment under the management of a most competent young officer, Capt. Jos. F. Janda, who has seen active service in the Cuban war.

ANNOUNCEMENTS.

Calendar for 1905-1906.

FIRST FALL TERM of Ten Weeks—

Begins.....Tuesday, August 8, 1905

Closes.....Friday, October 13, 1905

No vacation.

SECOND FALL TERM of Ten Weeks—

Begins.....Tuesday, October 17, 1905

Closes.....Friday, December 22, 1905

Vacation One Week.

WINTER TERM of Ten Weeks—

Begins.....Tuesday, January 2, 1906

Closes.....Friday, March 9, 1906

No Vacation.

SPRING TERM of Ten Weeks—

Begins.....Tuesday, March 13, 1906

Closes.....Friday, May 18, 1906

No Vacation.

SUMMER TERM of Nine Weeks—

Begins.....Tuesday, May 22, 1906

Closes.....Thursday, July 19, 1906

Vacation two weeks.

SPECIAL SUMMER TERM of Four Weeks—

Begins.....Monday, June 18, 1906

Closes.....Friday, July 13, 1906

FIRST FALL TERM of 1906—

Begins.....Tuesday, August 7, 1906

Continues Ten Weeks.

Commencement Exercises of the College of Liberal Arts, College.....

of Law and College of Engineering.....Thursday, July 19, 1906

Government.

The University publishes no stereotyped rules of conduct for its patrons. Each student is placed upon his honor. While students are assisted in forming correct habits, this is not a reform school. Persons who cannot govern themselves are not wanted. The opportunities and advantages of the University are offered to all who earnestly desire to develop the best there is in them and wish to fit themselves for usefulness. All are treated as ladies and gentlemen until they prove themselves otherwise. Regular attendance in classes and thoroughness of work is insisted upon. Incurable and morally corrupt persons are dismissed from the University.

Students are expected and will be required to patronize the University. When they patronize institutions of music, oratory, and other such, in no way connected with the College, their connection with the University will cease. Having once enrolled in classes, after the lapse of a week there can be no changing to other classes.

There can be no true education where the moral and religious natures of the students are neglected. The management feel it a duty to give attention to this department of culture. The University is owned and controlled by the Methodist Episcopal church, but is in no sense sectarian. Students are received on equal terms and treated with equal courtesy without regard to religious belief or denominational preference. Students are invited to attend the services of the church of their choice. The seven churches of the town invite them to their services.

Attendance upon chapel service is made mandatory upon teachers and pupils. These services are held at least twice a week. The Y. M. C. A. and Y. W. C. A. are recognized as the religious organizations of the school. The State Secretary of the Y. M. C. A., now in the employ of the school, will have charge of the religious meetings of the University. Seniors are expected to speak at chapel service. Their speeches having been submitted to the teacher of public speaking for inspection and correction, both as to composition and delivery.

The Claims of the University for Patronage.

1. Because students can enter at any time and find what they want.
2. Because the University receives students of all grades of scholarship.
3. Because the Common Branches receive as much attention as the Higher Branches.
4. Because the University through its Normal Department makes a specialty of fitting teachers for their work.
5. Because all of her instructors are specialists in their lines.
6. Because her instructors are kind and sympathetic, and make the welfare of the student of first importance.
7. Because of the wonderful enthusiasm everywhere manifested in recitation room and out.
8. Because the work done is practical and fits young men and women to do something after leaving her walls.
9. Because she offers thorough work in many special lines.

10. Because she invites inspection as to the work done and guarantees what she advertises.

11. Because expenses are low—so low that many find it cheaper to go to school here than to stay at home.

12. Because nowhere else can so much be gotten for so little money.

13. Because the school is the friend of the poor boys and girls, and furnishes them an opportunity to get an education they could not otherwise obtain.

14. Because of the strong intellectual and social environment felt everywhere within her walls and in the town.

15. Because of the healthy moral and religious life felt throughout the school and town.

16. Because the citizens of the town take a deep interest in the students and try to make their stay pleasant.

17. Because the student can take just such studies as he needs and is not confined to a special curriculum of studies.

18. Because where the student is compelled to drop out of school for any reason, he does not lose his standing in his classes, but can resume his work at any time, and when he has finished his course can graduate.

19. Because the town is healthy and free from the vices so common in larger cities.

20. Because the students room and board in private families and the home life is not sacrificed by rooming in dormitories.

21. Because no entrance examinations are required of students before they can be admitted to full standing in the University classes.

22. Because every student is treated as a gentleman or lady. They are placed upon their honor.

23. Because our students know the true worth of hard honest work. Lazy students are not countenanced.

24. Because our students are satisfied with the work of the University and work for her. They are our best advertisements and our best advertisers.

25. Because the country has come to recognize the character of the instruction given here and the demand for our graduates to fill places of trust, honor and profit is greater than the supply.

THE FIRST BAPTIST COLLEGE OF MEDICINE.

FACULTY AND INSTRUCTORS.

ALBERT EDWIN SMITH, D. D., Ph. D., *President*.

GEO. E. SIMMONS, M. S., *Auditor*.

MRS. MOLLIE SIMMONS, Secretary, O. N. U. Office.

FREDERICK MAGLOTT, A. M.

Dean of History, Geography, and Astronomy.

F. B. WILLIS, A. M.

Dean of History, Civics and Political Economy.

J. B. GREGG, A. M.

Dean of Physics and Chemistry.

AARON S. WATKINS, B. L., A. M., Ph. D.

Dean of English Language and Literature.

HENRY WHITWORTH, A. M.

Dean of Latin Language and Literature.

R. H. SCHOONOVER, A. M., B. D.

Librarian and Dean of Greek and Hebrew Language and Literature.

MRS. EVA MAGLOTT, A. M.

Mathematics.

T. A. MARTIN, B. S., A. M.

Mathematics.

W. F. HUFFORD, B. Ped., M. S.

Dean of Normal Department.

A. HANDLEY HIXSON, B. S.

Microscopy, Biology and Sciences.

MRS. VALERIA HIXSON,

Assistant Instructor and Preceptress.

WILLIAM GROTH, A. B.

Dean of Modern Languages.

S. P. AXLINE, LL. D.

Dean of Law.

W. D. CORN, A. M., LL. M.

Law and Rhetoric.

CHARLES B. WRIGHT, G. S.

Dean of College of Commerce.

G. S. JOHNSON, M. C. S.

Practical Business Department.

W. E. CRIM, M. C. S.
Theoretical Business Department.

A. B. STAUFFER,
Penmanship.

CLIFFE DEMING, A. M.
Oratory and Elocution.

MRS. MAE McCOPPIN,
Assistant Instructor.

JOHN WILBUR DENNY, Mus. B.
Dean of College of Music.

MRS. J. W. DENNY,
Assistant Instructor.

MISS LUCINDA D. DENNY,
Art.

FLORENCE SCHINDEWOLF,
Piano, Pipe Organ.

THOS. J. SMULL, C. E., B. S.
Dean of College of Applied Sciences.

D. C. MOHLER, Ph. G.
Dean of College of Pharmacy.

CHRISTIAN B. STEMEN, A. M., M. D., LL. D.
Dean of College of Medicine.

SAMUEL H. HAVICE, M. D.
Secretary of College of Medicine.

WILLIAM P. WHERY, M. D., F. R. C. P., LL. D.
Emeritus Professor of Hygiene and Gynecology.

JOSEPH L. GILBERT, M. D.
Emeritus Professor of Theory and Practice of Medicine.

GEORGE W. McCASKEY, A. M., M. D.
Clinical Medicine.

KENT K. WHELOCK, A. M., M. D.
Clinical Ophthalmology.

WALTER W. BARNETT, A. M., M. D.
Principles of Surgery and Clinical Surgery.

GEORGE B. STEMEN, M. D.
Professor of Obstetrics.

ALPHEUS P. BUCHMAN, A. M., M. D.

Professor of Diseases of the Digestive System and Rectum.

MILES F. PORTER, A. M., M. D.

Professor of Surgery, Clinical Surgery and Gynecology.

WILLIAM O. GROSS, A. M., M. D., Ph. G.

Professor of Chemistry and Toxicology.

BUDD VANSWERINGEN, M. D.

Professor of Theory and Practice of Medicine and Clinical Medicine.

HERMAN A. DUEMLING, A. M., M. D.

Professor of Anatomy.

ALBERT E. BULSON, JR., B. S., M. D.

Professor of Ophthalmology.

MAURICE I. ROSENTHAL, M. D.

Professor of Pathology, Gynecology and Clinical Gynecology.

SAMUEL H. HAVICE, M. D.

Professor of Laryngology, Rhinology and Otology and Assistant to Chair of Ophthalmology.

WILLIAM H. MYERS, A. M., M. D.

Professor of Abdominal Surgery and Clinical Surgery.

HIRAM VAN SWERINGEN, A. M., M. D.

Professor of Materia Medica and Therapeutics.

CARL SCHILLING, M. D.

Professor of Theory and Practice of Medicine.

L. PARK DRAYER, A. B., M. D.

Professor of Diseases of Children.

ELMER E. MORGAN, M. D.

Professor of Physical Diagnosis.

CHARLES E. BARNETT, M. D.

Professor of Genito-Urinary Surgery and Surgical Anatomy.

JAMES B. McEVOY, M. D.

Professor of General Pathology and Bacteriology.

WARREN D. CALVIN, Ph. B., M. D.

Professor of Dermatology and Physiology.

ALBERT H. MACBETH, A. M., M. D.

Professor of State Medicine and Hygiene.

B. W. RHAMY, M. D.

Professor of Physiology.

H. I. SMITH, LL. B.

Professor of Medical Jurisprudence.

J. C. WALLACE, M. D.

Lecturer on Materia Medica.

J. A. LOMAS, M. D.

Demonstrator in Chemical Laboratory.

CHARLES R. DANCER, M. D.

Lecturer on Embryology and Histology.

E. M. VAN BUSKIRK, M. D.

Lecturer on Osteology and Visceral Anatomy.

LOUIS W. SCHMIDT, Ph. G.

Demonstrator of Chemistry.

HERMAN GRIEBEL, M. D.

Assistant to Chair of Pathology.

L. R. FAST, M. D.

Lecturer on Diseases of the Rectum.

Assistant Instructor in Chemistry and Physics.

(To be supplied.)

Assistant Instructor in Pharmacy.

(To be supplied.)

MARILLA BAINES,

Librarian of Reading Room.

COURSES OF STUDIES.

Twenty different courses of study are sustained by the University, covering, except in Theology, all the usual lines of study sought by the student.

It is the aim of the University to give thorough, practical instruction in every Department, so that the student upon the completion of his courses of study will be able to do real work in his chosen profession. As evidence of this fact, the graduates from the University are everywhere leaders in their communities, whether in the Teaching profession, Law, Medicine, Politics, Business, or in any other calling.

The College of Liberal Arts offers to young men and young women five different courses.

These various courses of study are all arranged to meet the practical wants of the times.

After completing the Common School Course, the student can pass directly to any of the other courses. After completing the Teachers' Course, one more year will complete the Literature Course; after this,

another year will complete the Classical Course. There is no loss of time.

The College of Engineering offers five Courses. The College of Commerce three Courses. The College of Music, a number of Courses.

Those having completed any of the courses offered by the University, are awarded appropriate honors in the way of certificates or diplomas.

English3	"	100 "		Elementary1	"
Physiology1	"	50 "		Advanced1	"

Remarks.

All the various courses of study sustained by the University are arranged to secure the natural development of the mind and to meet the demands of the age. The Common School Course includes all the common branches usually taught in district schools. The instruction in these branches is in charge of experienced and skillful teachers. The greatest care is taken that the student shall lay in these branches the most careful foundation for his future work in other courses of study. This course is well suited to those desiring to prepare themselves to teach in country and small village schools. While the studies of this course are arranged in terms, classes of several grades are formed in all of them at the beginning of each term, so that the student can always find work in any branch of this course he wishes to take up. He may enter at any time and find classes to suit his needs. The Common School Course is designed to accommodate those students who are not sufficiently advanced to enter immediately upon a regular college course. It receives all who are moderately acquainted with the simple branches of an ordinary common school education. Its importance cannot be over-estimated, from the fact that the early training of the youth gives coloring to the whole after life.

Students pursuing this course can take any studies from any course in the College of Liberal Arts without extra charge.

A certificate will be issued to those having completed this course.

*Elective, See page 17

Remarks.

Latin:—Introductory, 2 terms; Caesar, 2 terms; Cicero, 2 terms.

Virgil:—1 term.

Physics:—Class, 75 hours; Laboratory, 150 hours.

Chemistry:—Class, 50 hours; Laboratory 100 hours.

Literature:—English, 1 term; American, 1 term.

The work of the Normal Department is pre-eminently that of fitting teachers for their profession. The curriculum includes all the branches usually taught in High Schools. Anyone who thoroughly masters all the studies prescribed in the course will be well qualified to take charge of any academy or graded school.

The aim of this course is—

1. To furnish a *thorough, practical, fundamental knowledge of the branches studied*, whether for common, graded, or high schools.
2. To give rational *methods of teaching* these branches.
3. To develop *correct habits of investigation*, and of working up material into a beautiful, symmetrical, spiritual structure.
4. To give copious exercises which involve use of *blackboards, globes, apparatus, instruments, blocks, objects, etc.*, with a view of enabling teachers to introduce the same into their schools.
5. To aid in forming *clear and exalted conceptions* on the dignity and importance of the *teacher's work* realizing that he is responsible, in a great measure, for the moulding and assimilating of American character.
6. To study the science and history of education in general, and to become acquainted with the great system of instruction which now demands the attention of intelligent educators.
7. To become acquainted with the best educational supplies of the day, including text-books, journals, reports, school laws, globes, furniture, etc.
8. To show how the subjects can be taught rather than prescribed text-books; to teach the philosophy of mind-culture; to create a high-toned professional feeling among teachers.

Training Classes.

Classes are formed for the special training and instruction of those who intend to prepare themselves for the teacher's duties. The work in these classes consists of a series of familiar lectures by the teacher on such topics, as Education, The Science of Education, The Art of Teaching, Methods, The Mind, The Recitation, School Management, School Law, etc.

The studies marked with a star (*) are called electives.

With the approval of the Dean of the Department other studies of equivalent value may be substituted for these.

The Post-Graduate Course.

In accordance with the demand and spirit of the times we have added to our Teachers' Course postgraduate work in Psychology, History of

Education and Science of Education. We have not only added this work to our regular Teachers' Course in compliance with the request of the State Board of Examiners, but also because we believe that the true teacher, who deals with mind, should know as much about mind as possible, and that he should be well acquainted with the *history* of his profession, and that he should be well versed in the *science* of that profession. The necessity of the added work appears self-evident.

Graduates from the Teachers' Course are entitled to the degree of Master of Pedagogy after completing the Teachers' Post-Graduate Course.

TEACHERS' POST-GRADUATE COURSE.

Psychology.

Ladd's Psychology, Descriptive and Explanatory	Preyer's Mental Development of the Child
Jame's Briefer Course in Psychology..	Sully's Psychology

*Elective, See Page—

Remarks.

Latin:—Introductory, 2 terms; Cæsar, 2 terms; Cicero, 2 terms; Virgil, 1 term.

German or French may be substituted for Latin.

Literature:—English, 1 term; American, 1 term; Advanced, 1 term; Nineteenth Century, 1 term.

Physics:—Class, 75 hours; Laboratory, 150 hours.

Chemistry:—Class, 50 hours; Laboratory, 100 hours.

In Physics the class work is supplemented by a course of five to ten hours a week in large and well equipped laboratories. The student is given work that will throw him upon his own resources, develop his originality, and give him a thorough knowledge of the subject.

Our chemical laboratory is extensive and complete. Each student is provided with a table and apparatus for individual work. By a course of eight hours a week in laboratory practice, original investigation and qualitative analysis, the student is required to apply intelligently what he has gotten in the lecture room.

Remarks.

There are many who feel that they cannot spare the time nor the means to complete the Classical Course, but who yet want to give considerable attention to the Classics and to the special studies in English and English and American Literature, History and Political Science. The University offers to such our Literature Course, covering a period of three years. We take pride in saying that nothing more complete and attractive of its kind is offered.

Class Work.

We endeavor to follow two lines of work—first, a study of the history of English Literature; second, a study of the text of English representative authors. In the first we dwell upon the leading facts in the lives of authors, and the principal facts about their productions. Beyond this, we try to discover the relation of the writer to his times, or his place in the great events of English history.

Theses upon some literary subject assigned by the teachers are required of the students at different periods of the work.

Modern Languages.

To those desiring to study German, French and Spanish, the University offers thorough instruction. Prof. Wm. Groth, who is at the head of the department of Modern Languages, is a graduate of one of the best German universities. He speaks all of the above named tongues fluently and is a skillful and successful teacher.

The University confers upon those who complete this course the degree of Bachelor of Literature.

*Elective, see page 17.

Remarks.

This course of studies will meet the demand of those who desire something more extensive than that furnished by the Literature Course. No more thorough and complete curriculum of studies is offered by any other college or school in the state. While the mathematics, science, history and literature all receive due attention, the classics are made more of

a specialty than in the other courses. German or French may be substituted for the electives.

This department offers the following courses in Ancient Languages:

LATIN.

It is the aim of this department to utilize as fully as possible the efficiency of Latin as an instrument of education and a means of culture. The student's effort is directed, not only to a mastery of the structure and mechanism of the language, and to a faithful rendering into idiomatic English, but also to an appreciation of Roman writings as exhibiting the genius of the age in which they were written, and to a proper estimate of Rome's place and part in the realm of literature. Attention is given to the history of the people, the biographies of their great men, their manners and customs, home life, religion and worship.

Fifteen terms of work are required for the degree of A. B., ten for the degree of B. L. and seven for the degrees of B. Ped. and B. S.

Courses are as follows:

Pre-Collegiate.

1. First Year Latin (*Collar and Daniell*).....2 terms
2. (a) Cæsar's Gallic War (Any quantity-marked text).....2 terms
- (b) Latin Prose Composition (*Pearson*).....2 terms
3. (a) Cicero's Orations (*Allen and Greenough*).....3 terms
- (b) Latin Prose Composition (*Pearson*).....3 terms
4. Virgil's Aeneid (Any recent text).....3 terms

Classes in *Beginning Latin* and *First-Term Caesar* are former each term; other classes in the pre-collegiate courses are found when there is an enrollment of five or more, not including town-students.

Collegiate.

5. HistoryLivy, Book XXI.....1 term
- Tacitus, Germania and Angriola (*Allen*).....1 term
- Sallust, Jugurtha1 term
6. Lyric Poetry.....Horace, Odes and Epodes (*Bennett and Rolfe*).....1 term
- Tibullus and Propertius, Selections (*Ramsey*).....1 term
7. PhilosophyCicero, De Senectute et De Amicitia (*Bennett*).....1 term
- Cicero, De Officiis.....1 term
- Cicero, Tusculan Disputations (*Rockwood*).....1 term
8. ComedyTerence, Selected Plays.....1 term
- Plautus, Captivi and Trinummus (*Morris*).....1 term
9. Epistolary Writing.Cicero, Selected Letters (*Abbott*).....1 term
- Pliny, Selected Letters (*Wescott*).....1 term
10. Literary Criticism..Cicero, De Oratore.....1 term
- Tacitus, De Claris Oratoribus (*Bennett*).....1 term
- Quintillian, Institutes1 term
11. "Satura"Horace (*Bennett and Rolfe*).....1 term
- Persius (*Gildersleeve*)1 term
- Juvenal (*Wright*)1 term

Each of the courses 5, 6, 7, 8, 9, 10 and 11 may be elected entire or in part, the work of any term to be selected with the advice and approval of the head of the Department. Necessary class-adjustments partly determine the order in which these courses are pursued.

GREEK.

The First Greek Book (<i>White</i>).....	2 terms
Xenophon, <i>Anabasis</i> (<i>Goodwin</i>), with Prose Composition (<i>Jones</i>).....	2 terms
1. Epic Poetry.....Homer, <i>Iliad</i> (<i>Seymour</i>).....	2 terms
Odyssey (<i>Seymour</i>).....	1 term
2. Lyric Poetry.....Selections from the Greek Lyric Poets (<i>Tyler</i>).....	1 term
Pindar, Olympian and Pythian Odes (<i>Gildersleeve</i>).....	1 term
3. DramaÆschylus, <i>Prometheus Bound</i> (<i>Wecklein</i>).....	1 term
Sophocles, <i>Antigone</i> (<i>D'oge</i>).....	1 term
Euripides, <i>Medea</i> (<i>Allen</i>).....	1 term
4. HistoryHerodotus, Book VI. and VII. (<i>Merriam</i>).....	1 term
Thucydides, Book I. (<i>Morris</i>) and III. (<i>Smith</i>) or Books VI. and VII. (<i>Lamberton</i>).....	1 term
Xenophon, <i>Hellenica</i> (<i>Manatt</i>).....	1 term
5. PhilosophyPlato, <i>Apology</i> and <i>Crito</i> (<i>Wagner</i>).....	1 term
Phædo (<i>Wagner</i>).....	1 term
Xenophon <i>Memorabilia</i> (<i>Anton</i>).....	1 term
6. OratoryDemosthenes, <i>De Corona</i> (<i>Tyler</i>).....	1 term
Lysias, <i>Ten Orations</i> (<i>Wait</i>).....	1 term
Isocrates, <i>Panegyricus</i> (<i>Felton</i>).....	1 term
7. Sacred Greek.....New Testament, one of the Gospels (<i>Wescott and</i> <i>Hort</i>).....	1 term
Eusebius, <i>Ecclesiastical History</i>	1 term

Any approved author or book may be substituted in the advanced Courses.

For the degree of A. B. ten terms of Greek are required. The required amount of work is to be selected from the above courses. The courses may be elected entire or in part. When a class desires to read but one or two authors of any course, the remainder of the work in that course will be studied from a literary standpoint in collateral reading and by the use of outlines, lectures, topical research, etc. Each author is studied in his relation to the general outline of Greek literature, in which work Jebb's *Primer of Greek Literature* is made the basis.

Classes will be formed in beginning Greek at the opening of the First Fall Term, the Winter Term, and the Summer Term, or any time that a sufficient number desire, though students are requested to choose those points for beginning as far as possible.

In addition to the above curriculum of studies, each student is required to take one term in advanced rhetoric—consisting of original productions in composition, essays, orations, theses, debate. One term in oratory is also required. This additional work is also required in all the Liberal Arts course.

Bookkeeping.

All engineering instruction naturally divides itself into two distinct parts: first, a study of the elementary principles involved, and, second, the application of these principles to the practical problems of engineering experience. The first is of definite and fixed scope, and our aim has been to make this part of the work most thorough; mathematics is the basic science and about one-half of the time of an entire course is devoted to it. The second includes Engineering as an art, and is of indefinite extent, so that the instruction must necessarily consist of the consideration of the most typical problems of engineering experience only.

In this connection we wish to state that we have shortened our course not by cutting down the instruction in engineering subjects, but by throwing out altogether all those subjects, such as French, German, Greek, Latin, Literature, Zoology, etc., which are not directly connected with the science of Engineering. By doing this we have placed an engineering degree within reach of thousands of worthy young men whose time and means will not permit them to spend the long period of four years in preparation for a profession.

A fee of \$2.50 is charged for the use of instruments for each term in field work. No extra tuition is charged in any of the engineering courses.

CIVIL ENGINEERING.

Course of Study.

FIRST TERM.....	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM.....	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM.....	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM.....	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM.....	II. Analytical Geometry, I. Descriptive Geometry, II. Chemistry, Plane Surveying.
SIXTH TERM.....	I. Calculus, II. Descriptive Geometry, Field Engineering, Astronomy.
SEVENTH TERM.....	I. Railroad Engineering, I. Graphic Statics, II. Calculus, Masonry.
EIGHTH TERM.....	I. Mechanics, II. Railroad Engineering, II. Graphic Statics, I. Stresses, III. Calculus.
NINTH TERM.....	II. Mechanics, II. Stresses, Elementary Structural Design, Field Astronomy, I. Mechanics of Materials.
TENTH TERM.....	III. Mechanics, I. Bridge Design, Least Squares, II. Mechanics of Materials.
ELEVENTH TERM...	II. Bridge Design, I. Hydraulics, Stereotomy, Structural Geology.
TWELFTH TERM....	Higher Structures, Law of Contracts, II. Hydraulics, Geodesy.

This is the parent stem of all engineering pursuits and in its broader sense includes all branches of surveying and engineering construction. Many of its former departments have grown into separate professions, yet there still remains a broad and important field offering larger opportunities than ever before. Beside the basic sciences common to all branches of Engineering, Mathematics, Physics, Chemistry, Astronomy and Mechanics, the technical instruction includes Drawing, Surveying, Railroad Engineering, Strength of Materials. Roofs, Bridges, Foundations, Arches Retaining Walls, Dams, Water Works, Improvements of Rivers and Harbors, Sewerage, Drainage, Hydraulics, Water Power and Geodesy.

The method of teaching is by means of class-room exercises, field work, practical drawing and designing. Much time is devoted to the study of steel construction, during which the student is made familiar with the computation of stresses, designing, detailing and drawing of roofs, bridges and steel structures of all kinds. The subject of roads and pavements, railroad construction and maintenance, and masonry structures are exhaustively treated. Special attention is given to Land, Topographical, Stadia and City Surveying and Leveling. We aim to fit men to act as county and city engineers, surveyors, railroad engineers, bridge engineers, structural engineers and government geodetic engineers. Besides the regular undergraduate work, special and more elaborate work will be given to those wishing to prepare for particular positions. Our equipment is second to none, being composed of high grade Transits, Levels, Solar Compasses, Prismatic Compasses, Hand Levels, Aneroid Barometers, Stadia Outfits, Sight Poles, Chains, Tapes Stereotomy and Descriptive Geometry models a collection of photographs and shop drawings of

bridges, a complete Blue Printing outfit and drawing room, and an excellent scientific library. This equipment is constantly being added to by purchase and donation and by construction by students of the department.

MECHANICAL ENGINEERING.

Course of Study.

FIRST TERM.....	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM.....	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM.....	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM.....	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM.....	II. Analytical Geometry, I. Descriptive Geometry, II. Chemistry, Plane Surveying.
SIXTH TERM.....	I. Calculus, II. Descriptive Geometry, I. Machine Design, Thermodynamics.
SEVENTH TERM.....	II. Calculus, Graphic Statics, II. Machine Design, Astronomy.
EIGHTH TERM.....	I. Mechanics, I. Stresses, Principles of Mechanism, Law of Contracts.
NINTH TERM.....	II. Mechanics, II. Stresses, and Elementary Structural Design; Least Squares, Heat Engines and Steam Boiler.
TENTH TERM.....	III. Mechanics, Masonry, I. Hydraulics.
ELEVENTH TERM...	II. Hydraulics, Foundations and Retaining Walls, Water Wheels and Turbines.
TWELFTH TERM....	Mechanics of Materials, the Steam Boiler, Bookkeeping.

The object aimed at in this course is to give the student, in addition to his knowledge of the engineering sciences, a thorough training in Mechanical Drawing, Strength of Materials, Machine Design, Applied Mechanics, Hydraulics, Principles of Mechanism and the Steam Boiler, and general Mechanical Designing of all kinds, and above all to supply him with a store of well balanced theoretical and practical knowledge which shall make him a success from the very beginning of his profession. Our equipment consists in addition to that named under the head of Civil Engineering, of a well chosen and up-to-date physical and electrical laboratory.

MUNICIPAL AND SANITARY ENGINEERING.

Course of Study.

FIRST TERM.....	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM.....	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM.....	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM.....	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM.....	II. Analytical Geometry, I. Descriptive Geometry, II. Chemistry, Plane Surveying.
SIXTH TERM.....	I. Calculus, II. Descriptive Geometry, Topographical and Hydrographical Surveying, Stereotomy.
SEVENTH TERM.....	II. Calculus, Roads and Pavements, Mapping, Earth Work, Graphic Statics.
EIGHTH TERM.....	I. Mechanics, Stresses in Simple Structures, Organic Chemistry, Astronomy.

NINTH TERM.....	II. Mechanics, Strength of Materials, Mathematical Astronomy, Least Squares.
TENTH TERM.....	III. Mechanics, Water Analysis, Sewer Design, Sewage Disposal.
ELEVENTH TERM....	Law of Contracts, City Surveying, I. Masonry, I. Hydraulics.
TWELFTH TERM.....	Foundations and Retaining Walls, II. Hydraulics, Water Supply, Bookkeeping.

This branch of Engineering is probably more nearly related than any other to the parent stem of Civil Engineering. The instruction consists of the basic engineering sciences, and most of the general civil engineering subjects, special attention being paid to those branches which have to do with the public health. This calls for a better knowledge of Chemistry, Bacteriology and Sanitation than can be obtained in the usual courses in Civil Engineering, and additional work is given in Topographic Surveying, Water Supply, Sewer Design, Sewage Disposal, Roads and Pavements and Precise Surveying. The increasing demand for this grade of engineering has made it one of the leading courses in all scientific schools.

ARCHITECTURE.

Course of Study.

FIRST TERM.....	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM.....	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM.....	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM.....	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM.....	II. Analytical Geometry, I. Descriptive Geometry, II. Chemistry, Plane Surveying.
SIXTH TERM.....	I. Calculus, II. Descriptive Geometry, Stereotomy, III. Descriptive Geometry.
SEVENTH TERM.....	II. Calculus, Curves and Earth Work, Graphic Statics, Crayon Drawing.
EIGHTH TERM.....	I. Mechanics, Stresses in Simple Structures, Law of Contracts, History of Architecture.
NINTH TERM.....	II. Mechanics, Strength of Materials, Least Squares, I. Architectural Drawing.
TENTH TERM.....	III. Mechanics, Roofs and Trusses, II. Architectural Drawing.
ELEVENTH TERM...	Higher Structures, Masonry, III. Architectural Drawing, Hydraulics.
TWELFTH TERM.....	Foundations, Estimates, Architectural Designing, Bookkeeping.

The object in this course is to unite a thorough knowledge of the mechanics of materials and engineering construction, with a special training in Architectural Design and Decorative Art. The instruction consists of the basic engineering sciences, most of the general civil engineering subjects, and an exhaustive course along the lines of Architectural History, Ornamentation, Decorating, Architectural Designing, Heating, Ventilating, Plumbing, Estimates, Fire Proofing and Superintendence.

ELECTRICAL ENGINEERING.**Course of Study.**

FIRST TERM	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM	II. Analytical Geometry, I. Descriptive Geometry, I. Machine Design.
SIXTH TERM	I. Calculus, II. Descriptive Geometry, II. Machine Design, Plane Surveying.
SEVENTH TERM	Graphic Statics, II. Calculus, Electrical Measurements, Stereotomy.
EIGHTH TERM	I. Mechanics, I. Stresses, Electrical Transmission of Energy, Masonry.
NINTH TERM	II. Mechanics, Mechanics of Materials, Dynamo Electric Machinery, Retaining Walls, Foundations.
TENTH TERM	III. Mechanics, Least Squares, Theory of Alternating Currents, II. Stresses, and Elementary Structural Design; Structural Design.
ELEVENTH TERM	Dynamo Electrical Machinery, Hydraulics, Law of Contracts.
TWELFTH TERM	Water Wheels and Turbines, Electrical Machine Design, Bookkeeping.

This branch of engineering includes all construction work and the care and maintenance of the same in which electricity plays the principal part. Our course consists of the basic engineering sciences, many of the branches of Civil and Mechanical Engineering and extensive research along the lines of Electrical Measurement, Testing, Electrical Transmission of Energy, Dynamos, Alternating Currents, Designing of Electrical Machinery and Water Wheels and Turbines. Our equipment consists of a thoroughly up-to-date physical and electrical laboratory and the drill in the text-books is illustrated by a series of careful measurements and other illustrations.

MINING ENGINEERING.**Course of Study.**

FIRST TERM	College Algebra, Freehand Drawing, I. Physics, Plane Geometry.
SECOND TERM	College Algebra, Lettering, II. Physics, Solid Geometry.
THIRD TERM	College Algebra, Mechanical Drawing, III. Physics, Plane Trigonometry.
FOURTH TERM	I. Analytical Geometry, Projection Drawing, I. Chemistry, Spherical Trigonometry.
FIFTH TERM	II. Analytical Geometry, I. Descriptive Geometry, Plane Surveying, II. Chemistry.
SIXTH TERM	I. Calculus, II. Descriptive Geometry, Blowpipe Analysis, Mine Surveying.
SEVENTH TERM	II. Calculus, Graphic Statics, Astronomy, III. Calculus.
EIGHTH TERM	I. Mechanics, I. Stresses, Law of Contracts, I. Geology, Mathematical Astronomy.
NINTH TERM	II. Mechanics, II. Stresses, and Elementary Structural Design; Least Squares, II. Geology, Assaying.

TENTH TERM.....III. Mechanics, Mechanics of Materials, Masonry, I. Hydraulics.

ELEVENTH TERM... II. Hydraulics, Mineralogy.

TWELFTH TERM....III. Hydraulics, Petrography, Machine Design, Bookkeeping.

This course includes most of the Civil Engineering subjects and an extended study of Historical, Dynamical and Economical Geology, Mineralogy, Crystallography, Hydraulics, and the assaying of Gold, Silver, Iron and Copper.

College of Commerce.

Faculty.

ALBERT EDWIN SMITH, D. D., Ph. D., *President.*

GEO. E. SIMMONS, M. S., *Auditor and Registrar.*

A. B. STAUFFER,

Business and Ornamental Penmanship.

S. P. AXLINE, LL. D.

Assistant in Stenography.

We live in the greatest commercial country in the world. There is today a rapidly increasing demand for trained men and women. Bookkeepers, Stenographers, Typewriter Operators, Penmen, Telegraphers, Clerks and Assistants are needed in every avenue of business. The time required to fit one's self in these lines is not so great but that all can avail themselves of the opportunity. The great drawback to this branch of education has been the expense. Few young men and women can afford to pay the enormous prices charged by our numerous business colleges. They have been organized to instruct in one or two branches and have no other means of support. Rent, light and fuel are high; the cost of living far exceeds that of a smaller place, and they cannot afford to take less than seventy-five to one hundred dollars tuition for a few months' course. We are located in a school town; we are a part of one of the greatest Universities in the United States, and have been training young men and women in these lines for more than thirty years. Our advantages are exceeded by none; the cost of an education here is extremely low.

We offer a course of training which thoroughly prepares young people for business. Our graduates are prepared to go into a business office and

perform the work with accuracy and dispatch. All departments of the College of Commerce are open to inspection, and if those who contemplate taking a business course will investigate the results obtained here, they will be convinced of the superiority of our system of instruction and training. Everything is thorough, practical, economical.

BUSINESS DEPARTMENT.

Course of Study.

Bookkeeping, Theoretical and Prac- tical.	Letter Press Copying.
Business Arithmetic.	Commercial Law.
Banking.	Rapid Calculation.
Actual Business Practice.	Business Forms and Customs.
Spelling.	Penmanship.
Office Work.	English and Letter Writing.
	Mimeographing.

Theoretical Bookkeeping.

The design of this work is to direct the student's mind for the work in hand, that of Practical Bookkeeping, and not to become confused with theories that can be of no possible use in the course of study nor of any practical value in business life. We require the student to give a clear reason for every step taken, so that when in actual business, he may have the ability to master the subject under all circumstances, and to be able to secure from the explanations and illustrations given, a thorough knowledge of the science of accounts.

The student is made acquainted with all the terms and principles of bookkeeping, and is led step by step, from the simpler to the more complex transactions. He is thoroughly drilled in Journalizing, Posting, Making out Statements, Trial Balances, Balance Sheets, and the various books used in Single and Double Entry, changing from Single to Double Entry. Careful instruction is given to writing commercial papers and business forms, such as promissory notes, individual drafts, bank drafts, checks, receipts, orders, etc. that are essential to Practical Business.

Actual Business.

After completing the Theoretical work and passing the examinations the student is promoted to the Practical Business Department, where his work is conducted on actual business principles. By our method, combining theory with practice, the student's mind and energies are fully developed and tested.

The student is furnished with Cash Capital, Bank Checks, Notes, Drafts, Receipts, Deeds, Mortgages, Leases Insurance Policies, Invoices, Articles of Agreement, Account Sales, Bill Heads, Bill Book, Pass Book, Ledger, Day Book, Cash Book, Invoice Book, Sales Book, etc., and is started in business for himself. He becomes in regular turn a Merchant with one, two, and three partners; he receives instructions in partnership,

Settlements, Methods of Adjusting Losses and Gains, Foreign and Domestic Exchange, besides must make original use of all books and blanks furnished.

A Merchant's Guide marks out the transactions the student must perform. In all the operations he keeps his own books and stands on his own merits.

After passing the required examinations, the student is promoted to the Office Work, where he enters the following offices, having full charge of everything in each, and is held responsible for all work done: Post Office, Real Estate, Brokerage and Exchange, Commission, Insurance, Railroad and Merchants' Emporium, after which he enters the Banks, of which we have three, with different systems of accounting in each. In each office the student is required to make use of books, forms, etc., designed for that particular line of work. Our office work is thorough and comprehensive in every detail.

The student is everywhere held responsible and required to perform his work with neatness, accuracy and dispatch.

Regular instruction is given upon the formation and controlling of National Banks, and upon Clearing House operations, as well as special instruction in making out Business and Legal forms.

Commercial Law.

While most commercial schools devote but little attention to this subject, we make it one of our most important branches. We take up only such subjects as will be of interest and use to everyone in business life, such as Contracts, Negotiable Papers, Agency, Partnership, Corporations, Bailments, Guaranty and Suretyship, Insurance, Personal Property, Real Property, etc. In recitation we make use of the question, lecture and topic plans, and use the quiz method in doing review work.

We maintain classes in Business Arithmetic, Rapid Calculation, Spelling and English Letter Writing each term.

Time Required.

About twenty weeks is the time required to complete the Business Course, depending upon previous educational preparation, application, aptness, etc. To secure a diploma from this Department, the student must have a grade of at least 85 per cent. in all the above branches. Military drill cannot be substituted for any grade in the College of Commerce.

There is no extra tuition in this Department, and all students are admitted free to all the regular classes in the University. A fee of \$3.00 is charged upon entering the Practical Department, to cover incidental expenses. A deposit of \$2.00 is also required for College currency, which will be refunded when currency is returned, deducting for loss. *The applicant for currency must present his receipt for the above named fee.*

Those having completed the above course are entitled to the degree of Bachelor of Commercial Science.

STENOGRAPHIC DEPARTMENT.

Young men and women cannot engage in a more lucrative business than shorthand reporting.

A large per cent. of the hundreds who write us regarding this Department, ask this question: "Is there a demand for stenographers?" The Employment Department of the Remington Typewriter Company is conducted through the regular offices in every important city in the United States. Last year the Departments in the eight largest cities placed over 20,000 stenographers. It supplies competent stenographers to users of writing machines, *without charge* either to the employer or the employee. We have been in correspondence with the heads of this department in Chicago, Cleveland and Pittsburg. They assure us that they can place all who carry a diploma from our College of Commerce and a letter of recommendation from the Dean. *Stenographers have unequalled opportunities* for advancement. Whenever promotions are made, the stenographer, from the very nature of his occupation, having become familiar with all the principles and methods of the business in which he is engaged, steps into the highest and best paid departments.

Course of Study.

Stenography.	Typewriting.
English and Letter Writing.	Penmanship.
Punctuation.	Letter Press Copying
Court Reporting.	Manifolding.
Spelling.	Mimeographing.
Filing and Indexing.	Office Practice.

We have one of the most complete and thoroughly practical courses of any school in the United States. The extensive correspondence of the Ohio Northern University and of the College of Commerce is all dictated to our advanced students. Arrangements have been made with the Secretary of the College of Law, College of Engineering, The University Supply Company, Ada Water, Heat and Lighting Company, and several of the leading business men of this place, to give their correspondence to our students as soon as they are sufficiently advanced; hence, each student gets practical work in nearly every line of business. Our graduates are capable of performing work in a general business office with more accuracy and dispatch than one who has had experience in but one line.

Systems.

To the beginner we recommend the Graham System; but we are prepared to teach any of the leading systems — Pitman, Munson, Dement, Eclectic. We do not ask those who have progressed in any of the above systems before entering our school to change from the system of their choice. We are thoroughly acquainted with all these systems, and only recommend the Graham because we believe it to be the most practical for all purposes. Those who graduate from this department will be required to have a grade in penmanship.

There is no extra tuition in this department, and all students are admitted to all the regular classes in the University.

TYPEWRITING DEPARTMENT.

This is one of the most popular departments of the University. Here the student is trained in Letter Writing, Copying, Manifolding, Letter Press Work, Form, Punctuation, Paragraphing, Capitalization, Filing and Indexing letters, Mimeographing, and all the work of a general business office. A fee of \$5.00 a term is charged for instruction in this department, and the use of typewriters, mimeograph, letter press, files, etc. Most of our typewriters consist of the latest models of the Remington. We also have Smith Premiers and Jewetts.

Those completing the above course of study are entitled to the degree of Bachelor of Stenography.

PENMANSHIP DEPARTMENT.

Penmanship is one of the most useful of all arts. Its beauty and gracefulness is admired by all. Every merchant or tradesman in search of a bookkeeper, stenographer or clerk inquires for a specimen of his writing. It matters not how good the student may be in the various branches, his education is not complete without a knowledge of practical penmanship. He often fails because he cannot write a good, legible hand with speed and accuracy. The person who can write well secures the position in preference to all others. He is not only in demand, but receives for his services the highest wages. The fewer employees needed, the higher the standard must be; and to add to a responsible position, one must be fitted for that position. There are hundreds of positions open today for good, competent instructors in penmanship in our public schools.

Special departments in penmanship are being added to the most of the public schools, and some one who is a proficient penman will be called upon to fill the position.

Skill in penmanship does not depend so much upon the correctness of the letters as the movement with which they are written. Unless the movement is free, bold and untiring, penmanship loses its beauty and value. The movement in this school is a free and swift one, being a pleasure instead of a burden to the person using such a movement.

Lessons in penmanship are free to all students paying the regular tuition.

For expenses in this department see general article on "Expenses."

To those who are not sufficiently advanced to take up the work in the College of Commerce we recommend our Common School Course.

Civics, Political Economy.

Law is now a science, and must be studied as such. A knowledge of the law means a knowledge of principles of right, so classified as to be readily made applicable to legal controversies, as they may arise, in every domain of right or wrong that requires remedial adjustment.

Admission.

Students may enter the College of Law at any time, and anyone holding a diploma from any reputable college, academy or high school will be admitted without examination; all others will be required to furnish satisfactory evidence of a sufficient knowledge of the common branches to begin the study of law and to pursue it profitably.

Courses necessary for admission to Ohio State Law examination. Either course is made necessary by law as a minimum requirement:

Special Work.

Classes for special preparation for examination are formed each term. The work in these classes consists of a review of the text-books, Digests of Ohio and other states, Ohio Decisions, Statutory Law and a review of the leading cases decided by the State and Federal Courts. Special work is also prepared by the instructors, which carefully takes up the leading topics in the law on which the student is to be examined.

Length of Course.

The course occupies a period of three school years. Those who have pursued the study of law elsewhere will be given credit for the work on presenting a certificate, signed by the one under whose instructions the work was done, or on presenting a certificate and taking an examination on the work certified to.

Degrees.

The degree of LL. B. will be conferred on anyone who completes the prescribed course of study and possesses the elementary qualifications necessary to admit him to the Bar examination of this state.

Books Rented.

Students can rent most of the text-books used in the course at reasonable rates. Those not desiring to rent, can purchase books at wholesale rates.

Recitations.

Each student will have from three to four recitations daily, in which he will go over a prescribed lesson, the instructor assisting on all points not understood by the pupil. These recitations are conducted in various ways, as by quiz, lectures, etc. Special attention is given to the quiz method, believing that by it the teacher can reach the student and help him along better than by any other single method, but the lectures and case methods of giving instruction are combined with the quiz method and are embraced in the class-room work.

A new law library is now found in the University, the books of which are for the use of the law students, for which a fee of \$1.00 will be charged, payable at the University office.

Moot Courts.

For the purpose of putting into practice that which is acquired, Moot Courts are held every Friday afternoon, in which the student gets actual practice of the various courts. He is required to get out all the papers necessary for his case, and every order of procedure is required to be strictly followed. Pleadings, writs, motions and journal entries, together with the principles of proceeding in appeal and error, form a part of the work of the student in these courts, and every detail is looked after by the Judge who sits in the case. Juries are chosen, witnesses are examined, motions made and heard, and everything is made to conform as nearly as possible to the practice of the regular courts. The practice that may be acquired during the course prescribed would be much greater and

more advantageous to the student than the actual work of the first three years of practice. Here his work is looked after and corrected, and he gets the advantage of knowing when the work is properly done without the responsibility that attaches to it in the court-room.

Advantages Offered.

1. The College of Law is connected with a University that enrolls more than three thousand students annually.

2. There are three Literary Societies to which the law student is admitted on equal terms with the literary students; debating clubs are formed, and every advantage is afforded in the way of forensic speaking and debate, not in the presence of a few persons only, but before the hundreds of students who assemble in the society halls on Friday and Saturday evenings of each week.

3. The course will be found to be much less expensive than elsewhere. Boarding, rooming and tuition are all below the prices offered at law colleges of the cities.

4. The student can enter at any time, and classes will be arranged to suit his degree of advancement.

5. All recitations are held at regular hours under the direct supervision of one of the regular instructors, and the student will receive from fifteen to twenty hours of recitation each week.

6. Special lectures will be given during each year by the best legal talent that can be procured outside of the regular course.

For expenses, see general article on "Expenses."

College of Music.

Faculty.

ALBERT EDWIN SMITH, D. D., Ph. D., *President.*

GEORGE E. SIMMONS, M. S., *Auditor.*

JOHN WILBUR DENNY, Mus. B., *Dean,*
Singing, Harmony, Public School Music, Director of Chorus,
Violin and Orchestral Instruments.

MRS. J. W. DENNY, Mus. B.,
Assistant in Singing.

FLORENCE SCHINDEWOLF, Mus. B.,
Piano and Pipe Organ.

The O. N. U. College of Music offers every advantage for the study of music that is required for a well rounded musician and artist. It is the purpose of the college to give the broadest culture and education possible to music students.

The course of study embraces instruction in Piano-forte, Organ, Violin, Orchestral Instruments, Voice Culture, Concerts and Choral Music, Public School Music, Harmony, Counterpoint, Theory and History. Each branch is so taught as to furnish not merely a separate acquirement, but an integral part of a musical and art education. Students completing any of the prescribed courses will receive a diploma from the University. The course of study is to prepare the student to fill any position that may be open to him after completing said course.

Voice Culture.

A proper knowledge of the use of the voice will aid in the purity of the tone, and also in its durability. The peculiarities of the individual voice is considered, and the work adapted accordingly. The following is an outline of the work pursued:

FIRST GRADE: Vocal Physiology, formation of tones by use of the vowels, relaxation of the muscles of the throat and tongue, tone placing, breathing, formation of consonants. Exercises for the above are given by the teacher, studies from *concone sieber*, *vaccia*, with selected songs.

SECOND GRADE: Continuation of the Principles, Vocal Studies, *Marchasie* op 1, 2, 3, *Bordogni* exercises in modern style, moderately difficult songs.

THIRD GRADE: All forms of vocal gymnastics, trills, chromatic scales, vocal armaments, *Marchasi* op 4, *Panofka* op 86, selected songs from the old masters.

FOURTH GRADE: Repertory, consisting of leading solos from the operas, oratorios, cantatas, art songs from Schubert, Schuman, Grieg, Brahms and others.

Pianoforte.

"Pianoforte music furnishes the standard by which all instrumental music is measured." A very broad and full course is offered. The length of time required to finish either of the instrumental courses depends upon the kind of work done before entering the college and upon diligence, talent and health.

FIRST GRADE: Technical studies, *Kohler* studies op 151 and 50, *Gurlitt* op 38 Bks Nos. 1 and 2, Vol. 1 and 2. *Mathews* graded course.

SECOND GRADE: *Mason* touch and technique. *Loeshorn* op 65 and 66 Bks 1 and 2 *Burgmuller* *Spindler*, *Heller*, *Kuhlau*, *Clementi*, and others.

THIRD GRADE: *Czerney*, *Henselt* studies preparatory octave studies, *Mathews* graded course, *Bach's* 2 and 3 part inventions, *Mendelssohn* song without words. Compositions by *Reinecke*, *Gurlitt*, *Spindler*, *Schuman* and others.

FOURTH GRADE: *Kuhlau* octave studies, *Cramer*, *Hensen* op. 32. *Gradus ad Parnassum*, *Clementi*, *Chopin & Fields*, *Nocturnes*, *Mozart* and *Beethoven* Sonatas. Compositions by *Mendelssohn*, *Gade*, *Moszkowski*, *Tschaikowski*.

FIFTH GRADE: *Gradus ad Parnassum*, *Chopin* *Etudes* op. 10 and 25. *Kuhlau* octave studies, *Mosheles* op. 70, *Bach*, *Well Tempere Clavichord*, *Concertos* by *Mendelssohn*, *Beethoven*, *Rubenstein*, *Sonatas* of *Beethoven*, pieces by *Henselt*, *Saint-saens*, *Tausig* *Bameau* and others.

Violin and Stringed Instruments.

The violin is the king of stringed instruments. And as such we offer a broad and systematic course of instruction.

FIRST GRADE: Dancla or David school for violin Bk. 1, Kayser op. 20 Hoffman Elementary studies, Gustave Hill Album for the Young, pieces by Dancla, Schmitt and others.

SECOND GRADE: Keyser op. 20 Bks. 2 and 3 Alard, 10 Brilliant studies op. 16, Mazas, Etudes Speciales, Jacob Doubt op. 38, Schubert, Sonatinas, Mazas Duets op. 38.

THIRD GRADE: Kreutzer Etudes, Rode 24 Caprices, Florilla 36 Etudes, Viotti Concertos and others.

FOURTH GRADE: Campagnoni, the seven positions, Alard 10 Artistic Etudes op. 19, Sevcik, school of double stops and changing position, Beethoven, Romanzem, Mozart and Beethoven Sonatas.

FIFTH GRADE: Dancla Etudes L'Artists, Wienawski Etude Caprices, Bach, six solo sonatas for violin alone. Vieuxtemps, Sarasate, Mendelssohn and others.

The Pipe Organ.

FIRST YEAR: Stainer's organ primer, first 24 studies for the organ, books 1 and 2 by George E. Whiting, Pedal studies, Schneider book 1, 10 tunes op. 49, by Rheinberger, books 1 and 2 selected. Hymns Ancient and Modern.

SECOND YEAR: Twenty preludes and postludes, book 1, Whiting. Studies in pedal phrasing, Buck. Etude Album for the organ, by Truette. Choir accompaniment, the easier selections from Buck's collection, and others.

THIRD YEAR: Buck's organ school, Bk. 5. Lemmen's Organ school, Bk. 2. Preludes and figures, by Bach. Concert pieces, by Guilmant, Batiste Whiting, Dubois and others.

The student should have at least three years piano before taking up the study of the pipe organ.

Harmony Course.

No one can claim a rank as a musician without a thorough knowledge of harmony counterpoint orchestration and musical form.

FIRST TERM: Definitions, intervals, scales, formations of triads, chord connections. The fundamental triads in major chords of the Dominant Seventh.

SECOND TERM: Collateral chords of the 7th and their resolution, inversions. Exercises with given Bass.

THIRD TERM: Other chords of the 7th, application in major and minor keys. Transposition freer leading of the seventh, 4, 11 and 13 cadences. Modulation.

FOURTH TERM: Passing tones introduced in compositions. Harmonizing melodies and the practical application of harmony.

FIFTH TERM: Chorals. Harmonizing a given soprano, alto, tenor bass. Jadassohn Harmony is used as a text. Also additional clefs.

Counterpoint.

FIRST TERM: Counterpoint first, second and third order.

SECOND TERM: Two and three part counterpoint. Contraquittal treatment of choral.

THIRD TERM: Double, triple and quadruple counterpoint imitation.

Science of Music.

This most important branch has been added to our course. No person can claim a rank among musicians without a thorough knowledge of the laws governing the great principles of music.

History of Music.

This is for more advanced students, and forms a most important part in the education of a music student. This study is continued through three terms. In addition to the regular recitation compositions from the composers under study are performed before the class.

Public Recitals.

Public recitals will be given frequently during the term, in which pupils are expected to perform as the teacher may direct. These recitals are very interesting to the public, and of incalculable benefit to the pupils, as it teaches them to appear before an audience without the feat and trepidation usually felt by those not accustomed to appear before the public. Each pupil completing a course in Piano, Voice, or Violin will be expected to give a recital before graduation.

SYNOPSIS OF COURSE OF STUDY.

Public School Music.

No field in the music profession offers the opportunity for rapid advancement as the teaching of music in our Public schools. The teaching of music in the various grades has become a science, and a clear comprehension of each minute subject must be had to obtain the proper results.

Special attention is given to the essential points. Tonal quality, rote singing, sounds of more than one beat, intervals, triads, two and three part singing, how to write melodies treatment and care of young voices, Music in High school. How to present the above subjects in a systematic order so that it will interest the pupil.

The instruction meets the difficulties arising in every day experience of a supervision. We endeavor to keep in touch with superintendents so that any vacancies that may arise, the pupils completing the prescribed course may be recommended to fill such vacancies.

A thorough knowledge of harmony, theory, and the history of music is required for the completion of this course.

FIRST TERM: Work as used in first and second grade. Rote singing, care of the voice, musical sound by imitation, first step in notation.

SECOND TERM: Third, fourth and fifth grade. The major scale, two

and three part singing, intervals, signatures, triads.

THIRD TERM: Sixth, seventh and eighth grades. Four part singing, boy altos, tenors, young basses Minor keys, Modulation.

FOURTH TERM: Music in High school, Conducting.

University Band.

There is an excellent band connected with the school. All wishing can join it without extra expense. The band furnishes music for the Military Department and public occasions in connection with the University. All who have band instruments are requested to bring them on coming to the University.

The O. N. U. Choral Society.

The O. N. U. Choral Society was organized in the Autumn of 1895 with Prof. H. W. Owens as director. With a membership of more than seventy-five trained voices, it has become a strong feature of the College of Music. More than twenty-five standard works, including Oratorios, Masses, Cantatas and Operas, have been given by the society.

The Choral has been victorious in National Eisteddfods at Cleveland, Cincinnati, Columbus, Pittsburg, Buffalo and many smaller points. Members of the Choral have won prizes in double quartets, quartets, duets, solos, etc. in all these Eisteddfods. The College of Music is prepared at all times to furnish soloists, duets and male, ladies' or mixed quartets for all public or private occasions. The Choral has regular rehearsals each week. All vocal students with suitable voices are enrolled as members.

Regulations.

1. All tuition payable in advance.
2. Credit will be given for work done elsewhere, and the pupil will be allowed to enter the grade for which he is prepared.
3. No allowance is made for absence from lessons except in case of protracted illness.
4. Pupils who will not practice will not be retained.
5. Excellent facilities are offered to those desiring to study Pipe Organ.
6. For expenses, see general article on "Expenses."

College of Oratory.

Faculty.

ALBERT EDWIN SMITH, D. D., Ph. D., *President.*

GEO. E. SIMMONS, M. S., *Auditor.*

CLIFFE DEMING, A. B., *Dean,*
Oratory, Physical Culture.

MAE DEMING McCOPPIN, O. M.,
Special Elocution.

A sound body and sound mind are the basis of all true expression. Our full course of study is intended to embrace a thorough training in the essentials of Expression.

Steps.

1. **PSYCHIC.**—Elementary Principles of Vocal Expression. Study and training to secure correct mental action in reading.
2. **VOCAL.**—Principles of Voice Culture. Training to develop the physical and psychic conditions of voice production, and to secure ease, purity and resonance. Sight reading.
3. **PLASTIC.**—Principles of Physical Training. Pantomimic action. Unity and co-operation in the agents of the body. Harmonic gymnastics.

Literature.

It is evident that all high attainment in the art of Expression must rest in the power to analyze the thought and feeling of the author whose lines the student would render. This presupposes an acquaintance with literature. A comparative study of various poets and authors will be given.

Recitals.

In addition to the regular Literary Societies each week, where opportunity of reciting is afforded our students, the Elocutionary and Musical Departments give semi-monthly recitals to inspire students to work. These recitals are occasions of marked interest, and the pupils are greeted by cultivated and refined audiences.

Libraries.

Students have access to the large and well selected libraries of the school, and are admitted to membership in any of the Literary Societies.

Fencing—Foil and Sabre.

The growing popularity of this sport is a convincing commentary upon its worth. Our instructor has had twelve years in military work, seven of

which as an officer. In addition to his regular course in fencing, he has had private work with Prof. Gordon Trowbridge, of Posse Gymnasium; Monsieur Lucien Fousnon and Signor Marco Piacenti, the foremost exponents of the French and Italian systems in America.

SYNOPSIS OF COURSE OF STUDY.

One Year's Course.

FIRST FALL TERM.—Voice Training, Physical Training, Articulation, Respiration, Quality of Tone, Pitch, Force, Stress, Volume, etc. Relaxing, energizing and directing exercises. Transition, Poise, Balance, Recitations. Sight Reading and Vocal Painting.

SECOND FALL TERM.—Physical and Voice Training, Rhythm, Tone Color and Harmony, Emission of Voice, Harmonic Gymnastics, Sight Reading, Recitations, Study of Rendering.

WINTER TERM.—Physical and Vocal Training, Bearing, Dramatic Attitudes, Sight Reading, Prose and Poetry, Laws of Gesture and Pantomime, Tone Color, Agility of Voice, Class Criticism, Recitations, Swedish and Delsarte Gymnastics.

SPRING TERM.—Sight Reading, Advanced Delsarte Work, Study of Literature and Expressions, Recitations, Narrative Poetry, Analysis of *The Lady of Shalott*, by Tennyson; *Lady Geraldine's Courtship*, by Mrs. Browning; shorter poems of Shelley, Wordsworth, Longfellow, Lowell, Whittier etc.

SUMMER TERM.—Study of miscellaneous selections from different forms of Literature, Voice and Physical Training, Sight Reading, Delsarte Principles, Comparative Study of Mythological Characters, Analysis of Shakespeare's *Merchant of Venice*, Dramatic Studies, Plays, Drills, Pantomimes, Monologues, Special Recitations, etc.

Post-Graduate Course.

This course of one year is especially arranged for those desiring greater proficiency as teachers, platform readers, and a broader acquaintance with great literature.

It is based upon the perfective laws of art and includes Composition and Delivery of Essays, Recitations, Orations and Debates, Extemporaneous Speaking; Cutting and Arranging Readings, Monologues, Drills, Plays and Evenings with Authors for Platform Work; Study and Rendering of Shakespeare's Plays, School Management, Normal Classes, Versification, Composition of Poems and Sonnets, Physical Culture and Gymnastics for Public Schools, Fencing, Club Swinging, Dumb-bells, Wands, Marching and Harmonic Gymnastics.

Pupils can enter this department at any time and find classes to suit. Those completing the one year's course will receive the degree of Bachelor of Oratory.

Those completing the Post-Graduate Course will receive the degree of Master of Oratory.

For further information write to the instructor, Prof. Cliffe Deming, Ada, O For expenses, see general article on "Expenses"

College of Fine Arts.

Faculty.

LEROY A. BELT, A. M., D. D., *President.*

GEO. E. SIMMONS, M. S., *Auditor.*

MISS LUCINDA DENNY, *Dean,*

Drawing, Painting, etc.

The art of drawing and sketching is almost indispensable to success in primary teaching. It is the same to the teacher of natural history and physics. In fact, Drawing, Sketching and Drafting are not only accomplishments, but are useful in nearly every calling in life. Drawing and Painting educate the hand and eye, cultivate a love for the beautiful, and refine our natures. Since Drawing has taken so important a place in our schools, the demand for teachers who can impart instruction has been great.

Painting.

LANDSCAPE, PORTRAIT, FRUIT AND FLOWERS IN OIL AND WATER COLORS.—Painting is considered at the present day as necessary an accomplishment as music. Besides the cultivation of taste and appreciation of the beautiful, which a knowledge of the art creates, it opens the eye to form and color as nothing else can. Within much less time and at much less expense, anyone of moderate ability can become a fairer painter than performer on the pianoforte.

Drawing.

PENCIL, INDIA INK, CRAYON, CHARCOAL, AND ALL BLACK AND WHITE WORK.—There is always a demand for crayon artists. The few materials, the ease and rapidity with which crayon work can be executed, and the comparatively short time required to learn it, are considerations that lead many to prefer it to oil painting. An accomplished artist has charge of this department.

Freehand and Perspective.

We pay special attention to Freehand, Lettering, Perspective, Projection and Mechanical Drawing. Those studying Engineering, Physics and Mechanics are required to take a thorough course in Drawing. All students of the University should avail themselves of the advantages offered in the department.

China Painting and Decorating of all descriptions are taught in the Fine Art Department. All students paying the regular tuition are admitted to general classes in Freehand Lettering, Perspective and Mechanical Drawing without extra charge.

Those wishing to graduate from the College of Fine Art will be required to do proficient and satisfactory work in the following branches: Freehand, Crayon, Perspective, Pencil, India Ink, Charcoal Drawing; Lettering; Painting in Landscape, Portrait, Fruit and Flowers in oil and water colors; Pyrography, or burnt wood; Sketching from Nature, and China Painting.

Those completing the above course of studies will be entitled to the degree, "Bachelor of Fine Arts." A graduation fee of three dollars will be charged.

For expenses, see general article on "Expenses."

College of Pharmacy.

Faculty.

ALBERT EDWIN SMITH, D. D., Ph. D., *President.*

GEO. E. SIMMONS, M. S., *Auditor.*

D. C. MOHLER, Ph. G., *Dean.*

J. B. GREGG, A. M.

Physics and Chemistry.

(To be Supplied.)

Assistant Professor of Pharmacy and Director of Laboratories.

(To be Supplied.)

Assistant Instructor in Physics and Chemistry.

The College of Pharmacy of the Ohio Northern University is recognized by the Ohio State Board of Pharmacy. The following are the conditions:

OHIO BOARD OF PHARMACY.

Requirements for Admission to Schools and Colleges of Pharmacy.

Resolved, That on and after July 1st, 1905, no school or college of pharmacy shall be recognized as in good standing by the Ohio Board of Pharmacy which does not require of all applicants as a minimum condition of admission, a common school education or the equivalent thereof, which shall include one year in a high school of first grade (Ohio), or an academy, legally constituted, providing a course of study of not less than four years.

Provided, That nothing in this resolution shall apply to students who have matriculated previous to November 1, 1904, in any school or college of pharmacy heretofore recognized as in good standing by the Ohio Board of Pharmacy.

Requirements Demanded of Schools or Colleges of Pharmacy.

Resolved, That on and after July 1, 1905, every school or college of pharmacy shall comply with the following requirements as a condition of being recognized as in good standing by the Ohio Board of Pharmacy:

1. It shall exact the requirements for admission to schools and colleges of pharmacy adopted by the Ohio Board of Pharmacy (October 13, 1904).

2. It shall possess an adequate equipment for teaching pharmacy in all its branches, including laboratory facilities and apparatus.

3. It shall have an adequate and competent faculty for instruction in the following branches: Pharmacy, Chemistry, Materia Medica, Microscopy, Physiology and Botany.

4. It shall require an attendance of 80 per cent. upon two graded

courses of instruction in branches specified (in Article 3), of not less than 26 weeks each, excluding holidays, in two separate years.

5. It shall exact an average grade of 75 per cent. on examination as a condition of graduation.

6. It shall admit students within thirty days after the opening of any school year, and it shall confer degrees in pharmacy only at the close of each school year upon the completion of the prescribed course of study.

7. Any college may honor official credentials issued by other colleges of pharmacy in good standing as determined by this board, so far as the work offered is the equivalent of or identical with the required work of the school to which credentials are presented, except in branches of study embraced in the last year of its own curriculum.

The school year in the College of Pharmacy will begin on October 17, 1905 and continue for twenty-six consecutive weeks, at the end of which time degrees will be conferred upon those who have completed the course.

Those who have matriculated before the above regulation was put into effect may continue their work until they have completed their course.

Those desiring preparatory work for Pharmacy can enter at any time and secure classes to suit their needs.

Those desiring Review work in Pharmacy can secure classes at any time of the year.

Pharmaceutical and Dispensing Laboratories.

VIEW IN JUNIOR PHARMACY LABORATORY.

Of these we have two, complete in every detail. The desk arrangement is such as to afford the students every facility for complete and thorough work. Each table is supplied with an entire outfit of apparatus (with storing closet) and each student receives full instruction in the

manufacture of Waters, Spirits, Tinctures, Syrups, Liquors, Extracts, Fluid Extracts Abstracts, Infusions, Decoctions, Oleates, Ointments, Cerates, Plasters, Papers, Suppositories, Emulsions, Collodions, Elixirs. Mucilages, Official Salts, and the more important unofficial preparations. The work embodies all the processes of Weighing, Measuring, Ignition, Calcination, Torrefaction, Incineration, Sublimation, Evaporation, Distillation, Desiccation, Exiccation. Granulation, Crystalization Precipitation, Dialysis. Filtration, Clarification, Decoloration, Extraction, Percolation, etc.

Our outfit was supplied by the celebrated firm of Whitehall, Tatam & Co., of Philadelphia, and E. B. Benjamin & Co., of New York, and consists of Remington stills, Retorts, Funnels, Adapters, Graduates, Mortars, Spatulas, pill Tiles, Beakers, Evaporating Dishes, Desiccators, Mixing Jars, Pipettes, Burettes. Balances, Metric Weights and Measures, Specific Gravity Apparatus, Thermometers, Urinometers, Alcoholometer, Lactometer, and all other necessary apparatus for intelligent work.

Expenses.

For tuition, see general article on "Expenses."

A Laboratory Fee of \$1.50 per term is charged, and each student is required to replace all apparatus broken or damaged. All drugs and chemicals are supplied practically at cost. The laboratories are open at all

VIEW IN SENIOR PHARMACY LABORATORY.

hours, and there is no limit placed upon the time that the student may desire to devote to his work, the minimum hours required being three hours each school day.

TEXT-BOOKS.—Remington's Practice of Pharmacy. U. S. Pharmacopeia. (1901 Edition.)

REFERENCE BOOKS.—United States and National Dispensatories, to be found in the College Library.

Chemistry—Junior Course.

The Laboratory for practical chemical work now possesses the most approved accommodations, and is fully equipped with all the accessories necessary for obtaining thorough knowledge of chemical analysis and synthesis.

Each table is supplied with a complete set of chemical reagents, and the student is required to perform a satisfactory amount of analytical and synthetical work. The Laboratory is open at all hours, and is under the personal attention of the Professor of Chemistry and an able assistant. A graded course will be pursued, and the instruction given will be carefully adapted to the proficiency of the student.

THE CHEMICAL LABORATORY.

The work is divided into two parts, commencing with the most simple chemical reaction between the inorganic bases and acids, gradually advancing to the more complete reactions of the inorganic bodies, and carbon compounds.

The greatest care is taken to inculcate a thorough and comprehensive knowledge of characteristic chemical reactions, thus enabling our

students the more readily to determine the purity of their drugs and chemicals.

TEXT-BOOKS.—Remsen's Organic Chemistry.

REFERENCE BOOKS.—Attfield's Ph. Chemistry and Simon's Manual of Chemistry, to be found in the College Library.

EXPENSES.—Each student is required to replace all apparatus damaged. Drugs and chemicals furnished at cost. Laboratory deposit, \$5.00, which covers two terms' work.

Chemistry—Senior Course.

The work in chemistry during the Senior Course will consist of a thorough study of the problems, embracing every form of chemical mathematics. Particular attention is given to volumetric and gravimetric methods of analysis. Our method of combining the lectures with thorough laboratory drill insures our graduates a comprehensive knowledge of analytical methods, such as can be had in no other school of pharmacy.

THE PHYSICAL LABORATORY

EXPENSES.—Same as for the Pharmaceutical Laboratory.

TEXT-BOOKS.—Attfield's Ph. Chemistry and Simon's Manual of Chemistry. Schimpf's Volumetric Analysis.

REFERENCE BOOKS.—U. S. Pharmacopoeia, Sutton's Volumetric Analysis and Fresenius on Volumetric Analysis, to be found in the College Library.

Botany and Materia Medica.

The first part of this work is devoted to the study of Elementary Botany. It will include the various organs of plants, as roots, rhizomes, stems, leaves, barks, flowers, cells, etc. This will be followed by the study of Materia Medica, in which special attention will be given to the classification of the vegetable and animal drugs, the specific names, properties, uses, doses, chief constituents, and methods of isolating them, synergists, incompatibilities and adulterations.

A complete cabinet of organic and animal drugs is provided for the use of students free of charge. Particular attention is given to prescription writing, and the analysis and compounding of prescriptions presenting practical difficulties and the best method of overcoming them.

TEXT-BOOKS.—Sayre's Materia Medica and Wood's and Gray's Botanies.

Microscopy.

A drill in the use of the microscope is continuous throughout the Junior and Senior courses.

Physiology.

A thorough course in Physiology is given.

TEXT-BOOK.—Martin's Human Body.

REFERENCE BOOKS.—United States and National Dispensatories, to be found in the College Library.

Advantages.

There is no large laboratory fee to pay.

Review classes are formed every ten weeks beginning August 8.

We guarantee at least 700 hours in practical laboratory work in our course.

Our diploma is accepted in lieu of the first year's lectures by the leading medical colleges.

We offer superior advantages to registered "Assistants" who wish to review for examination as "Pharmacists."

Our reading room receives all the leading journals in Pharmacy, and our libraries will be found to contain all the books needed for reference.

Our course as arranged insures each student recitations and laboratory work every school day (except Saturday), and not twice a week, as in nearly all other schools.

SYNOPSIS OF COURSE IN PHARMACY.

Junior Year.

Practices of Pharmacy, Elementary Chemistry, Microscopic Botany, Materia Medica, Chemical and Pharmacal Laboratories.

Study of Inorganic Pharmacals Materia Medica, Microscopy, Physiology, Organic Chemistry, Chemical and Pharmacal Laboratories.

Senior Year.

Study of Organic Pharmacals, Pharmacal Chemistry, Materia Medica, Pharmacal Laboratories and Microscopy.

Magistral Pharmacy, Organic Chemistry with Volumetric and Gravimetric Analysis, Prescription Writing and Compounding, Urinary Analysis and Laboratory.

Requirements for Graduation.

Each student is required to pass, with satisfactory grades, an examination at the end of each quarter's work, and the final examination upon the entire course. There will be no deviation from this rule.

Seniors will not be permitted to leave before the final examinations are concluded, under any circumstances.

The degree conferred is that of Pharmaceutical Graduate (Ph. G.).

Special Course.

Students wishing to pursue an extended course for two years for the degree of Pharmaceutical Chemist (Ph. C.), will first complete the course for the degree of Ph. G., after which the work will be extended. Students who may have graduated from schools requiring an equal amount of laboratory work will be admitted to the second year on presentation of proper credentials. Much of the work is elective, and it is divided into courses of six months each.

The laboratory equipment for our advanced course has recently been increased by the addition of a complete outfit for Gold and Silver Assaying and other metallurgical work. The apparatus includes a Bosworth Ore Crusher, Weatherhead Mortar, Hoskins Crucible and Muffle Furnace, Tongs, Crucibles, Scorifiers, Roasting Dishes, Cupels, Platinum Ware and other necessary appliances, and were supplied by the firm of E. H. Sargent & Co., of Chicago. The Pulp and Assay Balances were made by special order for our laboratory by the manufacturers, Messrs. Volland & Von Zelm, and are of the best and most delicate construction. The equipment is of the very best in every particular, and the students will find the work most practical.

For further particulars concerning the course, address the Dean of the College of Pharmacy.

COMMISSIONED OFFICERS - O. N. U. CADET BATTALION.

Department of Military Instruction.

Over six hundred students each year are well drilled in the schools of the Soldier, Company, Battalion, and in the ceremonies. In this department of the University no charge is made for tuition. Special attention is given to the preparation of the cadets for the United States Military and Naval Academies, and of candidates in the ranks of the Regular Army for commissions.

In accordance with Section 1225, Revised Statutes of the United States, as amended by the acts of Congress, approved September 26, 1888, and January 13, 1891, an officer of the Army of the United States States has been detailed to the University by the President, as Professor of Military Science and Tactics. The coming year Captain Joseph F. Janda will be in command.

Organization.

The Cadet Battalion at present comprises, with the Military Instructor, one cadet Lieutenant Colonel, one cadet Major, one cadet Adjutant, one Quartermaster and Ordnance officer, one Sergeant Major, five permanent Companies, two Artillery and Saber Detachments, and the University Band.

Material and Ammunition.

The arms and accoutrements and the field artillery, with necessary implements, are issued from the National Armories, and comprise the Cadet Springfield Rifle, cal. 45, late model, with belts and McKeever cartridge-box, and the 3-inch muzzle-loading rifle guns, model 1861, with carriage and limber. Swords and belts are provided for the cadet officers.

For practice firing, the following allowances of ammunition are made annually by the United States: 100 blank cartridges and 300 friction primers for 3-inch guns, and for each cadet actually engaged in target practice, 50 rifle ball cartridges or their equivalent value in reloading tools or target supplies.

An excellent 100-yard gallery range will be secured with marker's butt and two separate targets.

Appointments and Promotions.

The cadet officers and non-commissioned officers of each company are appointed from the privates of that company, and are also promoted lineally after a competitive examination in tactics before a Board of Examination, three constituting a quorum, composed of the Military Instructor and the Field Officers of the Battalion. Seventy is the minimum in standing allowed. Thus, as merit alone is recognized, and as all chance of favoritism is rendered impossible, a cadet private of ability and energy may pass, in time, successively through the intermediate grades to the captaincy of his company. The examination for the rank of officer or for the grades of non-commissioned officer comprises, for corporals, the school of the soldier; for sergeants, the school of the company and their duties as guides;

for lieutenants, the school of the battalion; for captains, the school of the battalion and the ceremonies. Captains who fail to maintain their companies in satisfactory condition, as to strength and instruction, are expected to promptly tender their resignation as company commanders.

No cadet will be permitted to appear before the Board of Examination unless he shall have attended, during at least one term, the theoretical instruction in the Drill Book, and shall have provided himself with the uniform complete, cap and white gloves.

A Military Diploma.

Commissions and warrants, similar to those used in the U. S. Army, are issued to the commissioned and non-commissioned officers after passing the examinations and receiving promotion. The commissions and warrants are supplied at actual cost, \$1.35 for commissions and 60 cents for warrants. These are certificates of military service valuable in after life.

Attendance.

Every able-bodied male student of the University is especially urged to enlist in the Battalion, yet no one is compelled to take either the practical or theoretical course of the Military Department. Having once registered his name, however, it is expected that he will habitually follow the drills or recitations until the actual close of the term. But all able-bodied students who intend to complete any regular University course will be expected to drill and recite in this department during three terms, as the same is not only made a part of each course, but is permitted as a substitute for any elective study of such course. Like weight is therefore given to tactics, etc., in class standing or in graduation, as to any other study. In order to obtain credit upon the records of the University, the cadet is required to be regular in attendance, to be subject to all military discipline, to drill not less than one hundred and fifty hours and to obtain a grade of not less than 85 per cent.

The drill, an hour each day, excepting Saturday (and so placed as not to interfere with the regular academical duties), will be found especially entertaining, invigorating and healthful—a most pleasing relaxation after the close and sedentary hours of the student's desk and recitation room.

University Band.

The Band consists of thirty-five pieces and a drum-major, uniformed by the University and provided with the necessary instruments and music. Any student may join when a vacancy occurs. All who have band instruments are requested to bring them with them on entering the University.

Text-Books.

The following text-books are designated for the course: Drill Regulations, U. S. Army, for Infantry, Artillery and Cavalry. Manual of Guard Duty, U. S. Army. U. S. Army Regulations (amended to date with introduction to forms in use in the company administration). Small Arms Firing Regulations—Blunt. Elementary Principles of the Art of

HOPE HOSPITAL.
College of Medicine, Ohio Northern University.

War—Hamilton. Security and Information—Wagner. Notes on Military Science—Califf. Art and Science of War—Wheeler. Drill Manual—Bordman. Manual of Physical Drill—Edmund L. Butts.

Prizes.

A special cash prize is awarded in each company during the Spring term to the cadet presenting the best military appearance, and showing the greatest proficiency in drill and discipline.

Prizes are also awarded for the best score on the target range.

Target practice is held on Saturday, whenever practicable, during First Fall, Spring and Summer Terms, and the Annual Rifle Competition for the University prizes, for the best company team of six men, and a battalion team of ten, the latter to take part in the Intercollegiate Contest, will hereafter be held on or about May 15. The feature of annual competition has just been introduced, and will be continued. The competition embraces individual practice and team firing by file and volley.

College of Medicine.

A union between the Ohio Northern University and the Ft. Wayne College of Medicine has been brought about, promising beneficial results in the interests of both schools.

The Medical College has a faculty of thirty-five teachers. Christian B. Stemen, A. M., LL. D., is Dean, and W. O. Gross, A. M., M. D., Ph. G., is Secretary. Cuts of the college building and two of the hospitals where the principal clinics are held are here shown. This Medical School is a member of the Association of American Medical Colleges. This association requires a literary qualification for both admission to and graduation from all Medical Colleges. The union of these two schools will offer best advantages to students requiring these qualifications.

This Medical College celebrated her twenty-fifth anniversary the past year. As the Ohio Northern University runs twelve months in the year, and the Ft. Wayne College but seven months, medical students can shorten their time for graduation by attending both schools the same year.

The Medical College year opens September 7, 1905, and closes April 15, 1906.

Expenses.

Matriculation fee of five dollars (\$5.00), payable but once. General Lecture fee including practical laboratory, dissecting and hospital tickets, each year, seventy-five dollars (\$75.00).

Ada and Ft. Wayne are only two hours apart on the Pennsylvania Lines.

For catalogue, address the Secretary.

ST. JOSEPH HOSPITAL.
College of Medicine, Ohio Northern University.

Expenses.

Matriculation.

No matriculation or entrance fee is required to enter the University. Some schools advertise free tuition, but it will be found that the above named fees with them amount to more than tuition with us, a fact which should not be overlooked by those selecting a school or college.

Tuition.

In all the departments, except Pharmacy, Music, Telegraphy and Fine Art, Tuition for term of ten weeks.....\$10 00
Tuition is payable strictly in advance. Anyone paying for less than a term will be charged \$1.25 per week.

College of Music.

Piano, Organ, Violin, Cornet, Flute, Guitar or any other instrument term of ten weeks two lessons per week.....	\$12 00
One lesson per week.....	6 50
Harmony, per term.....	6 00
Voice Culture, two lessons per week.....	12 00
Public School Music, per term.....	6 00
History of Music, in class.....	3 00
Use of Piano, one hour per day, per term.....	2 00
Use of Reed Organ, one hour per day, per term.....	1 00
Tuition for Rudimental Music per term.....	2 50
Piano rent, in student's room.....	10 00

The Rudimental Class is free to all students paying the Regular Tuition.

College of Oratory.

Class lessons, per term of 48 lessons.....	\$10 00
Class lessons, less than a term, per week.....	1 25
Private lessons (45 minutes), per term of 20 lessons.....	12 00
Coaching, single lesson.....	75
Delsarte Physical Training 15 lessons.....	3 00
Fencing, inclass, 16 lessons.....	4 00
Fencing, private instruction, 10 lessons.....	5 00

College of Fine Arts.

Pencil Drawing, Crayon Drawing, Water Colors, Oil Painting, India Ink, Mechanical and Industrial Drawing, Special Tuition, per term.....	\$10 00
In classes of five or more, per term.....	5 00
Miscellaneous Painting in Oil on any kind of material, per term....	5 00
Freehand, per term.....	3 00

All students paying the Regular Tuition are admitted to the general classes in Freehand, Lettering and Mechanical Drawing without extra charge.

Penmanship.

Business Penmanship, per term.....	\$ 2 75
Ornamental Penmanship, per term.....	3 25
Plain Penmanship, per term.....	2 50

College of Pharmacy.

Tuition, twenty-six weeks.....	\$41 60
--------------------------------	---------

A deposit of \$4.00 per term is required in the Chemical Laboratory, and a fee of \$2.00 per term, in the Physical Laboratory, to cover expenses of desk rent, material used and breakage.

Those who complete this course of study are entitled to the degree of Bachelor of Science.

Our Term Plan.

Thirty-one dollars paid in advance will pay tuition, board and furnished room for ten weeks. The Term Plan can be had at any time.

Graduation Fees.

In the Commercial Course, the Graduation Fee is \$2.00. In the Teachers', Scientific, English, Engineering, Musical, Pharmaceutical, Law, and Elocution, \$3.00. In the Literature and Classical Courses, \$5.00. Beautiful and neatly executed diplomas will be awarded to those who complete any regular courses of study. Those preferring real parchment will be charged one dollar extra. Candidates for any degree are required to pay full tuition graduation term.

Rooms, Boarding and Home Comforts.

Good board in private families, \$1.65 to \$2.00 per week.

Furnished room, two in each room, per week, 50 cents to 75 cents.

Light and fuel, per week, 5 cents to 30 cents.

Washing, per week, from 15 cents to 25 cents.

By self-boarding the above expenses can be somewhat reduced.

Ada is a school town, and the majority of families are engaged in rooming and boarding students. The competition is sharp; hence, prices are low and board is good. We could furnish board at \$1.25 a week, as advertised by some institutions, but we prefer to charge enough so as to furnish good, wholesome food. Food must be nutritious to supply brain nutriment. One of the marked features of the Ohio Northern University is the home care and comfort received by its students. The whole town is identified with the interests of the school. There are no dormitories. All students room and board in private families. The comfort and convenience of the student is made an object. When they are sick they are well cared for. Kindness is characteristic of the citizens towards the students, and of the students toward each other. The town is lighted with electricity; coal is chiefly used as fuel, but many houses are heated with hot air furnaces or hot water from the city heating plant.

Regulations.

1. In cases of protracted sickness, tuition will be refunded for the unexpired time, regular rates being charged while in attendance. Fractional weeks will be counted as full weeks. Where the student is called

from school on account of necessary business, a due-bill for the unexpired time will be issued him by the Auditor. At any future time he can re-enter the University by presenting his due-bill to the Auditor and receiving for which a new receipt for the unexpired time. No tuition will be refunded to students who have been suspended or expelled. Receipts are not transferable.

2. Any one taking the Term or Year Plan can at any time change to the ordinary rates, by paying full rates for the time in attendance. The balance of his board will be refunded; but room-rent is not refunded until the room is re-rented.

3. Students can enter the University at any time and take advantage of its privileges. They can nearly always find classes that will suit their needs. Each recitation is one hour long and every class recites five times a week. Each branch requires from ten to thirty weeks for its completion.

Students should allow on an average about two hours for the preparation of a lesson. Ordinarily four branches can be carried satisfactorily each term. Some persons can master only three while others may complete five. No student should undertake more than he can do well.

4. Final examinations for First Fall, Second Fall and Winter Terms will be held on Wednesday and Thursday of the tenth week; in the Spring Term they will be held on Monday and Tuesday of the tenth week, and in the Summer Term, on Monday and Tuesday of the ninth week. Examinations are also held about the middle of each term. Students are required to take all the examinations in the subjects pursued by them.

5. Composition, essays, theses and debates constitute a part of the work of each term.

6. Those desiring to make arrangement before their arrival in Ada, as to courses of study, board and room, will address the President of the University.

7. Students or their parents can get full report of class standing by enclosing a self-addressed stamped envelope to the Auditor of the University.

8. All students must receive a credit of not less than 75 per cent. in branches prescribed before being entitled to graduation.

9. All arrangements for graduation and degrees must be made with the office.

Degrees.

The University is empowered to grant all the usual degrees. The greatest care will be taken to grant them only to the deserving. They are not for sale, but must be earned. While the management accepts grades of equal value from other institutions of learning, it is required that the applicant for any degree do a reasonable portion of his academic work with us. No diploma will be granted upon grades made wholly in other institutions.

Candidates for any degree in the College of Liberal Arts and Engineering Courses will be required to complete the Common School Course in addition to the studies prescribed in the course from which they desire to graduate.

All persons having taken the Bachelor's degree with us, receive the Master's degree, providing they have been engaged for three years since graduation in literary or professional work, or have done one year of Post-Graduate work in the course from which they have taken the Bachelor's degree. Those desiring diplomas with the Master's degree will pay \$5.00. Other honorary degrees will be granted only upon the special recommendation of the Committee on Degrees.

Donations.

All persons interested in the cause of education, and especially in building up an institution of learning in Northwestern Ohio, are kindly invited to make donations of specimens—geological, mineralogical, zoological, botanical, historical, Indian relics, of any kind whatever—they may feel disposed to present to the University. **The names of all donors are preserved in the archives of the institution.** Label the specimens with the name of donor and locality.

Books for the University Library are earnestly solicited from any who may be minded to contribute works of value. Funds are needed for the erection and equipment of the Christian Association building. Men and women of means could not invest their means more wisely than to found endowments of chairs in the various departments of the University. A bequest blank accompanies this catalogue.

Aid to Students.

The Board of Education of the M. E. Church lends money to members of that church who are taking a course in school and have been in attendance long enough to merit a recommendation from the Faculty. No interest is charged for two years from date of graduation, and no security is required further than a recommendation from a quarterly conference and from the Faculty. Many of our best students avail themselves of this advantage.

For further information, address Prof. R. H. Schoonover, Ada, Ohio, who has charge of this fund.

Many of our students also make their entire expenses by working as waiters, janitors, and at other occupations in town and near, being able at the same time to carry on their studies in full work.
